

MM 3/13/00

2/29/00

Dear Harold,

Happy Leap Year Day! I hope this letter finds you and Lil in a good situation as possible. When you tell me of your health care experiences (mostly bad) I am amazed that you have the will and stamina to keep going. More power to you!

Regarding other matters of national interest I have mentioned that I am reading and researching are matters that I feel concerns all of us in this country and world wide. I feel that our government has covered up the Gulf War Illness(called Syndrome by some), WACO, The "Murder" of Vince Foster, TWA 800, and various other matters that the major liberal controlled media will not cover. An example is the tainted blood coming out of Arkansas's prisons (AIDS, Hepatitis, etc.) and sent to Canada which has eventually led to over 600 deaths, at the time this "empty suit" in the ^{Ark} white house was governor!

This administration for years denied that there was no gulf war illness and those vets who went to the VA for help were told nothing was wrong with them and to take two Prozac and don't call back. Since the early years denial, there have been extremely large number of our military that have suffered and died and this administration has reluctantly, slowly started to admit that maybe our troops sufered from chemical exposure when ammo dumbs were blown up in the desert; then they said that the vaccines forced on our troops might have been a factor, then someone admitted that the oral vaccines might also have contributed and finally, I noticed an article about the depleted uranium rifle and artillery shells were used with no notice or warning. There still has not been a clear cut admission by the leaders.

Waco has been a simmering pot for quite a while, with the survivors bringing a civil suit due to commence in May of this year. I don't know if you have been following the story in the media, but Sen. Danforth is heading a group that is supposed to determine what happened on April 19th, when the Davidian Church was burned to the ground which resulted in the deaths of 80 some people including 20 some children. To this day, the government (FBI) is claiming that no shots were fired into the building on this day. However, private investigators obatined evidence from the aftermath that the Texas Rangers had stored, and a lot of new information was "discovered" which again casts doubt on the official government story. Part of this is an infra red video, filmed by the FBI from aircraft circling above which, according to experts, show gunfire by those outside shooting at those inside! Just the other day, the government said well, maybe the "lights on the film" might be gunfire. The Army Delta Force was there and probable took part in the assault on the Davidians.

There is a lot of unreported facts regarding Vince Foster that contradict the official finding of suicide. It boggles your mind when you read the facts, at Ft. Marcy Park, which contradict the finding of suicide. Physical evidence denied, cameras suddenly don't work, x-rays taken but disappear, eyewitness statements that conflict with the official version ignored, and when witnesses maintain their statements, they are harassed! Sort of reminds you of what happened in the Kennedy case.

With TWA 800, there is excellent information developed that conclusively shows that the plane was hit by a missile. The main source of independent investigation is headed by a former Navy pilot, who has a list of credentials second to none that the NTSB or FBI had. I am enclosing some of William Donaldson's info taken from the internet for your review. There is a second source by an author named James D. Sanders, who along with his wife, was prosecuted by the Justice Department for obtaining two sample of the back of a seat on 800, and sending one to an independent lab for chemical analysis. The result was that all elements are consistent with the exhaust residue of a solid fuel missile. The government was very upset and denied the findings stating that the red residue was glue that held the cloth to the seats. Both Sanders and his wife were prosecuted for trying to find out the truth! Both were convicted and received sentences of probation even ^{though} the govt. was pressing for jail time. Lesson; don't mess with big brother! Interestingly, Sanders was one of three authors of a book published in 1992 titled "Soldiers of Misfortune, Washington's Secret Betrayal of American POW's in the Soviet Union". I wonder if this prior publication had anything to do with the government's zeal in prosecuting him for two small pieces of cloth? Also, I noticed in our only paper, the K.C. Star, in a AP story, that a Russian emigre said that he learned that dozens of American servicemen from WWII and Korea were detained in Siberian labor camps! Will the truth ever come out?

Well, I guess I have been on my soapbox long enough. If you have an interest in any of the above topics, let me know and I will send you some copies. Besides printed material, I have audio tapes and videos. Do you have a cassette recorder/player and a VCR? Let me know.

Also, around the 8th or 9th of March, you will be receiving another box from Harry's Groves. This time it will be all grapefruit! Regards to Lil.

Sincerely,
